TECHNICAL SKILLS:

- Programming Languages: Python, Java, C, JavaScript
- Web & Mobile Development: HTML5, CSS3, React.js, Node.js, Android Studio
- Databases & Cloud Platforms: MySQL, MongoDB, Amazon Web Services, Google cloud processing
- Version Control & DevOps: Git, GitHub, Docker
- Development Tools & IDEs: VS Code, JIRA, Arduino IDE
- Embedded & IoT Systems: Arduino, ESP32, Raspberry Pi
- AI/ML Frameworks & Libraries: TensorFlow, CUDA, NumPy, pandas, Open CV

PROJECTS

The Indian Insite

May 2025 - Present

- Led a 4-member team to build a full-stack platform for analyzing media bias in Indian and international news using NLP.
- Engineered the backend with FastAPI, and designed responsive UIs using React and Bootstrap.
- Integrated GPT and Sonar APIs for real-time news summarization and political bias detection.
- Managed collaboration and deployments using GitHub, Jira, and CI/CD pipelines under agile methodology.

GOD'S EYE (Guided Optical Detection & Smart Environment Yield Evaluation)

Apr 2025 - Jun 2025

- Led a 6-member team to develop a wearable obstacle detection system combining AI-based monocular depth estimation with real-time object recognition using MiDaS (DPT-Large) and YOLOv8.
- Engineered GPU-accelerated depth estimation and enabled user calibration for precise real-world distance measurement.
- Implemented audio feedback via text-to-speech to announce detected objects and distances in real time.
- Directed elevation detection using ESP32 and ultrasonic sensors to identify ground-level changes and alert users.
- Oversaw 3D modeling and fabrication of a wearable enclosure for comfortable, practical deployment.

Smart Medicine Dispenser with Digital Operator

Nov 2024 - Mar 2025

- Led a project to build an ESP32-based automated pill dispenser with real-time tracking and user alerts.
- Developed a custom Android app integrated with Firebase Realtime Database for cloud-based schedule management.
- Implemented RTC, servos, LCD, buzzer, and EEPROM for precise dosage timing and user feedback.
- Designed and assembled a 3D-printed modular enclosure to enhance safety, portability, and user compliance.
- Successfully published a patent for the innovative design and technology of the dispenser.

EDUCATION

Vishwakarma Institute of Technology, Pune

Bachelor of Technology in Computer Science Engineering (Artificial intelligence)

[2024 - 2028]

Suryadatta Public School, Pune

Higher Secondary Certificate (HSC) – Maharashtra State Board

[2022 - 2024]

City International School, Kothrud, Pune

Secondary School Certificate (SSC) – CBSE Board

[2022]

EXTRACURRICULAR & CERTIFICATIONS

Member, The Robotics Forum

Research and Development
